

Laser HEALING THERAPY[®]

ALL 5 OF OUR LASERS ARE **FDA CLEARED** AND **REGISTERED MEDICAL DEVICES**

We perform PHOTOBIO-MODULATION or PHOTON THERAPY. Not COLD LASER THERAPY. Cold lasers are 40 year old technology. OUR LASERS ARE STATE OF THE ART AND THE NEWEST IN TECHNOLOGY. WE WERE THE FIRST TO BRING THIS TECHNOLOGY TO WILMINGTON. WE HAVE TREATED HUNDREDS OF PATIENTS SINCE WE OPENED IN DECEMBER OF 2015. 90% PLUS SUCCESS RATE FOR PATIENTS. COMPARE THAT TO ANY OTHER MEDICAL OUTCOME SUCH AS DRUGS OR SURGERY FOR PAIN. FDA STATES " NO KNOWN ADVERSE SIDE EFFECTS"

CONDITIONS WE CAN IMPROVE, HEAL OR REVERSE THE SYMPTOMS CAUSING CHRONIC PAIN AND INFLAMMATION:

- ATRIAL FIBRILLATION
- ALZHEIMER'S
- ANXIETY
- ARTHRITIS
- AUTOIMMUNE
- AUTISM
- BACK PAIN
- BED SORES OR WOUNDS THAT WON'T HEAL
- BURSITIS
- CARPAL TUNNEL - CAN ELIMINATE SURGERY
- CERVICAL/NECK PAIN
- CHRONIC HAND PAIN, NUMBNESS OR STIFFNESS
- DEMENTIA
- DEPRESSION
- DIABETIC AND PERIPHERAL NEUROPATHY
- DOWN SYNDROME
- EPICONDYLITIS OR TENNIS ELBOW
- FIBROMYALGIA
- HIP JOINT PAIN - CAN ELIMINATE HIP REPLACEMENT
- HERNIATED / BULGING DISCS
- KNEE PAIN - CAN ELIMINATE KNEE REPLACEMENT
- MIGRAINES
- PARKINSON'S
- PLANTAR FASCIITIS
- PTSD
- OPEN WOUNDS THAT WON'T HEAL
- ORAL MUCOSITIS
- ROTATOR CUFF HEALING - PREVENTS SURGERY
- RHEUMATOID ARTHRITIS
- SCIATICA
- SCOLIOSIS
- SHOULDER PAIN AND FROZEN SHOULDER
- SPINAL STENOSIS
- SPORTS INJURY (ANY)
- TMJ PAIN
- TRAUMATIC BRAIN INJURY

WHAT CAUSES PAIN?

NEUROLOGISTS SAY 99% OF CHRONIC PAIN IS DAMAGED NERVES. The average human nerve is about the size of a human hair. There is NO SURGERY OR DRUG THAT WILL HEAL DAMAGED NERVES! Our immune system is the only way to heal pain by healing the nerves.

WHAT IS PHOTON THERAPY?

A PAINLESS, NON INVASIVE, HIGHLY
EFFECTIVE ALTERNATIVE MEDICAL
TREATMENT FOR HEALING PAIN WITHOUT
OPIOIDS, SURGERY OR JOINT REPLACEMENT

This technology has been used around the world for 30 years on millions of people. Pain medications are very effective and provide relief for millions. However, long term use destroys the immune system as well as many other very undesirable side effects, like possible addiction.

Surgery causes further trauma to an injured area and scar tissue. LASER THERAPY DOES NOT.

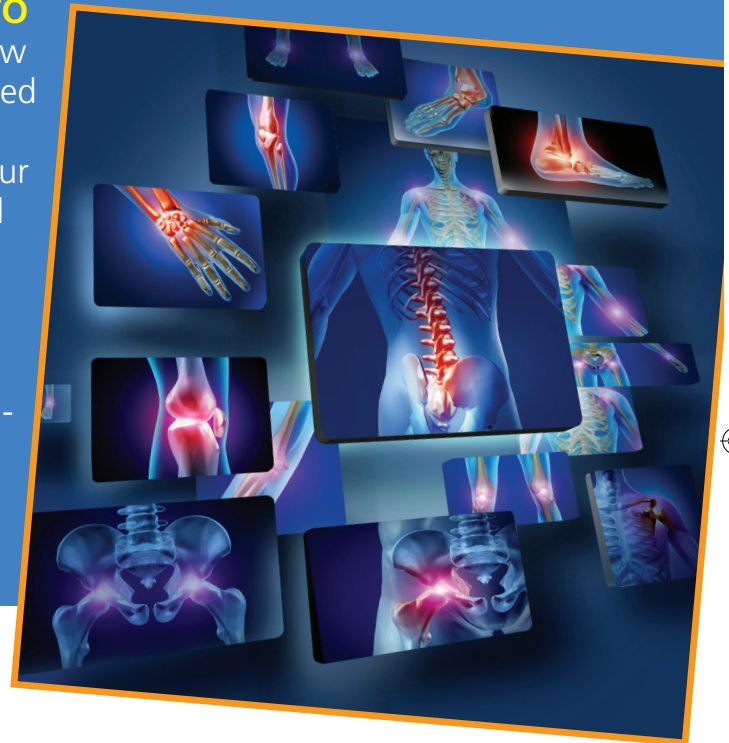

Thus, no chance of any further trauma to an already injured area.

HOW & WHY IT WORKS?

FIRST: All pain medications work by numbing the brain. Your immune system is controlled by our brain. Medication just masks the symptoms of pain, hence "pain management" and does nothing to heal the cause of the pain. After a period of time, patients require stronger doses because the body builds up a resistance. Then addiction results because the brain demands it both physically and mentally.

SECOND: The laser is placed on your skin. All a patient feels is a very pleasant warming sensation. The infrared beam generated by our lasers penetrates **DEEP, 5 TO 6 INCHES**. It triggers the release of a gas called nitric oxide, that is contained inside our red blood cells. This causes our blood vessels to dilate or expand which greatly increases blood flow **TO THE AREA WITH DAMAGED NERVES CAUSING THE PAIN**. Increased blood flow enhances the healing. Each repetitive treatment reduces the healing time. That is documented medical research.

THIRD: HARVARD MEDICAL SCHOOL in 2014, proved our class of lasers triggers stem cells to be released from our bone marrow which stimulates the body **"TO REGENERATE NEW TISSUE"**. Thus an increase in blood flow and many new stem cells are the body's way to heal damaged nerves or tissue anywhere from our brain to our toes. Stem cell injections are a one time process. However, each time our lasers are engaged on the body, blood flow is increased and new stem cells are released. Blood test results for t3 counts, which means the current circulating stem cell count, performed before and after the first treatment proves as much as a 100% increase in new stem cells being released by the laser! Treatment sessions are usually 5 to 6 weeks with multiple treatments during that time. This demonstrates why this technology is far superior in the outcome to heal pain from damaged nerves! As treatments progress it has cumulative effects in healing pain.

THE FDA, (FOOD AND DRUG ADMINISTRATION), STATES LOW LEVEL LASER THERAPY AS A THERAPY CAUSING "NO HARM TO PATIENTS, NO KNOWN SIDE EFFECTS". COMBINE THIS WITH A 90% PLUS SUCCESS RATE FOR PATIENTS.

Each laser treatment by one of my three registered nurses on the painful area increases blood flow and triggers new stem cells to be released from our bone marrow. During the no cost consultation I offer, a patient asked, "how do the new stem cells find the painful area?" Wonderful question! All damaged tissue has what medical science refers to as a negative ion (-) charge or minus charge. All healthy cells in the body carry a positive (+) ion charge. Positive

and Negative cells attract each other just like magnets. Therefore damaged nerve cells have a negative charge. Every six weeks the human body duplicates every cell in our body creating new cells. However, damaged nerves contain many negative cells so they continue to reproduce damaged nerve cells. This is why the pain does not go away. Laser therapy increases blood flow, thus reducing inflammation. New stem cells arrive with each treatment and a healing process begins in 90% of people. Compared to stem cell injections, a one time occurrence, our laser triggers multiple, new natural doses of your own stem cells to repair the body! Our average protocol is 5 to 6 weeks of treatments.
